

MOSAIC PUZZLE

SKILL DEVELOPING GAME FOR 3-100 YEAR OLDS

The CaraWonga mosaic set contains colorful textile mosaic pieces with a cork layer as the bottom. The textile pieces are made of 80% recycled industrial felt.

The pieces are manually cut with a punching machine. No chemicals are used during the manufacturing process.

CaraWonga is a source of creativity, a chance for concentration and good mood, but it is also a great STEAM educational tool.

This game enhances the sense of rhythm, the sense of 3D, logical skills, fine motor skills and eye-hand coordination. You can create a pattern according to the ideas included in the package or design your own ones.

GAME IDEAS

1. FREE CREATION

Form shapes or colored patterns.

2. SIMPLE SHAPES

Form rhomb shapes, stars, hexagons, a flower, a house...

The possibilities are endless, only your imagination sets the limits.

3. MANDALA

Start with a star or a hexagon and arrange the colors around it to create a symmetrical pattern!

4. ANIMAL WORLD

Butterflies, bees, giraffes or turtles - bring them to life.

Remember, you can even stack the mosaic pieces on top of each other!

5. 3D MOSAICS

Design 3D images. Example: combine three rhombi of different tones (light–medium–dark) into a hexagon.

The result might be a cube or a flight of stairs etc.

6. MEMORY GAME

With the cork side face down, look for the pair of a mosaic piece.

Use 2-4 mosaics of one color.

7. ONE FOR YOU – ONE FOR ME

Play together! Put down the rhombi one by one into a pattern.

8. CREATING A MANDALA IN GROUPS OF 4-6

Each member of the group chooses a color of their own, and in each turn, everyone puts down a specific number of rhombi (you agree in advance on how many).
